Visual Acuity Screening Letter

Dear Parent or Guardian:

The Utah Department of Health and the schools in our community strongly supports routine vision screening in schools as one of the easiest and most effective tools in detecting and providing referral for treatment of commonly occurring visual problems. The vision of students is vital, especially for classroom learning, so it is important to identify any barrier to learning that can be corrected.

Vision Screening is not a substitute for a complete eye exam and vision evaluation by an eye doctor. Therefore, if you are concerned that your child may be having eye problems, you should consult your family physician, ophthalmologist, or optometrist for further evaluation.

Some indications of possible eye problems are:

a. Double vision	e. Eye disorders
b. Excessive blinking, rubbing	f. Persistent redness
c. Drooping lids	g. Squinting
d. Blurred vision	
	Law, Your child has had a visual acuity screening by a qualified vision screener.
Screening inform	
Name (print first name and last na	me): Date of screening:
☐ Your child was able to read	the adequate line on the chart with each eye for his/her age.
recommended to take your child to	o read the adequate line on the chart with each eye for his/her age. It is preceive a professional eye examination. Please take this form to be completed by the and to be returned to the School Nurse.
